

Mountain Lake Stewardship Plan 2013 Survey

We've all seen many changes around our lake and our world in the past few years.

- It has now been five years since we published the first edition of the Mountain Lake Property Owners Lake Stewardship Plan.
- It has been almost eight years since we used a survey questionnaire to obtain your opinions and priorities on many matters regarding our lake community, and the results were valuable.

Since then, some of you may have become permanent residents. In addition, a new Minden Hills Official Plan is ready for final approval and some bylaws updated.

Also, the very nature of our lake and its waters and shores may have changed: we've realized Minden and surrounding areas, including our lake and its entire chain, are subject to major flooding.

Changes will continue, and we need your help to make plans to ensure that the essential qualities of the lake are maintained for future generations.

We have prepared and attached a brief survey questionnaire so that you can assist in this goal. By adding your email address, your lake association can readily contact you if a serious matter requires your attention. The email address will only be used for that purpose by the Mountain Lake Property Owners Association..

We would be grateful if you would complete this survey and return it to us in the stamped self-addressed envelope provided, by August 20th if possible. Results will be published in the Fall Newsletter.

We assure you that we do not give, sell, or otherwise transfer your personal information to third parties without your prior consent, and all information is used only in the aggregate.

Many thanks for your help

The Mountain Lake Stewardship Plan Committee
